

## Really is necessary 5 components to install a thermometer with thermowell on-line?

**NO.** In any case with our integration solutions.  
 With us, with one component is enough:

- Low cost.
- Low time installation.
- Save space.
- Professional installation
- Minimizes connections => Reduces risk of leaks.
- Without threaded connections.
- Ensures contact between the bottom thermowell and the thermometer for correct temperature transmission.
- No additional components are required to install the thermometer.
- It is not necessary supports, the TE is installed online.
- Allows the orientation of the thermometer in any position.
- Adaptable to any manufacturer of fittings (Swagelok, Parker, Fitok, ...)
- Valid for any manufacturer of thermometers.
